PROFILE

Final-year BSCS student with a strong focus on Flutter-based mobile development and AI application engineering. Currently building Campus Pulse, a full-stack university app with face recognition attendance, real-time chat, and event management using Flutter and Firebase. Hands-on experience delivering three production-level projects across mobile, web, and AI domains. Completed a software development internship working with Laravel and PHP backend systems. Ranked in the top 20% nationally in the HEC National Skill Competency Test (NSCT) 2026.

TECHNICAL SKILLS

- Mobile Development:** Flutter, Dart, Firebase, Firestore, Hive, Face Recognition (ML Kit)
- Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Figma
- Backend:** PHP, Laravel, Node.js, Express.js, REST APIs
- AI and ML:** Python, RAG (Retrieval-Augmented Generation), FAISS, LangChain, LLaMA 3.3, Gemini API, Groq API, YOLO, gTTS, Whisper STT
- Database:** Firebase Firestore, MongoDB, MySQL
- Tools:** Git, GitHub, Android Studio, VS Code, Canva, Postman
- Languages:** Dart, Python, JavaScript, C++, Java

EDUCATION

University of Punjab, Lahore (GGCP Affiliated) BS Computer Science	2022 to Present CGPA: 3.44
Superior College For Girls, Daska FSc Pre-Engineering	2020 to 2022 Grade: A
Community Model Girls High School Padali, Daska Matric (Science)	2018 to 2020 Grade: A+

WORK EXPERIENCE

Laravel Developer Intern DYNISO (Dynamic Software Solutions), Pasrur <i>2-month internship focused on PHP and Laravel web development</i>	Aug 2025 to Oct 2025
- Built and maintained backend modules using Laravel MVC architecture, including controllers, routes, and Blade views - Worked on RESTful API development and MySQL database design under senior developer guidance - Integrated third-party APIs and contributed to ongoing client web application features - Strengthened practical skills in version control (Git), debugging, and agile team workflows	

PROJECTS

Campus Pulse <i>Flutter Dart Firebase Firestore Hive Face Recognition Push Notifications</i>	Final Year Project
- Full-stack university mobile app built for students and teachers with role-based access control - Implemented face recognition attendance system using device camera and ML Kit integration - Developed real-time chat, event management, and push notification modules with Firebase backend - Used Hive for offline caching and designed consistent UI with custom curved header components - Followed a modular screen architecture separating student and teacher flows across the entire app	
Rahbar AI Civic Complaint and Legal Assistance System <i>Python RAG FAISS LangChain LLaMA 3.3 Gemini API Groq YOLO Gradio ReportLab</i>	2026
- Built a full AI-powered civic complaint platform for Pakistani citizens covering all 7 provinces and 100+ cities - Designed a RAG (Retrieval-Augmented Generation) pipeline indexing Pakistan Supreme Court judgments and civic law datasets from HuggingFace and Kaggle using FAISS vector search	

- Integrated LLaMA 3.3 via Groq API and Gemini Vision for bilingual legal advice in Urdu and English
- YOLO-based image detection verifies complaint photos before submission; auto-generates official PDF reports with ReportLab
- Features include voice input (Whisper STT), text-to-speech output (gTTS), complaint tracking dashboard, and WhatsApp sharing

Pakistan Legal Chatbot RAG-powered Legal Q and A System

2026

Python | RAG | FAISS | TF-IDF | LLaMA 3.3 | Groq API | Gradio | gTTS

- Developed a standalone bilingual legal chatbot focused on Pakistan Supreme Court case law and citizen rights
- Built a TF-IDF based RAG retrieval system over 4000+ legal document chunks with character-level n-gram indexing for accurate semantic matching
- Integrated Groq LLaMA 3.3 for context-aware legal answers with citations, escalation paths, and helpline references
- Supports Urdu, English, Punjabi, and Sindhi responses with voice output and an auto-drafted petition generator

SparkleHub Skincare E-Commerce Website

2025

MongoDB | Express.js | React.js | Node.js | Tailwind CSS

- Built a full-stack skincare product e-commerce platform using the MERN stack from scratch
- Developed product listing, shopping cart, and user-facing responsive UI with React and Tailwind CSS
- Implemented REST APIs with Express.js and MongoDB for product management and user data

Other Projects: Netflix Clone, Amazon Clone, Quiz App, Rock-Paper-Scissors, Portfolio Page

CERTIFICATIONS AND ACHIEVEMENTS

| By NCEAC and HEC Cohort 3, ULEF USA | May 2026 |
| • NSCT (National Skill Competency Test) April 2026 | Score: 82% |
| Top 20% nationally out of 33,000+ candidates across 190+ universities | |
| • Google IT Automation with Python | 2025 |
| • React JS Mastery, Hadi E-Learning System | 2024 |
| • MS Office ,Superior College Daska | 2022 |

ABOUT ME

I have a consistent track record of building and shipping complete products rather than just course projects. From a Flutter app with face recognition to an AI legal platform handling real civic complaints, each project reflects end-to-end ownership. I pick up new stacks quickly, which is why I was able to contribute during my Laravel internship despite having a mobile-first background. I work well independently and bring a problem-solving mindset to every challenge.
